**Interior Restoration Kit**

Porsche 911 Coupe 1974 - 1989

## The parts included in our kit

*Note: Picture shows '87 Carrera 3.2 Coupe interior. Slight variations apply throughout the '74-'89 period. All our interior kits are manufactured specifically for your year and chassis number.*

Our Standard Interior Restoration Kit for the Porsche 911 Coupe (3.0 SC '77-'83 and Carrera 3.2 '84-'89 models) includes everything you typically need to bring your interior back to factory new condition:

- Complete Carpet Set, OEM sliverknit, (19/21 pieces, Diagram ref 1)
- Door Panels, Ready-To-Install, pair (Diagram ref. 2)
- Door Capping Retrim Kit, front and rear (Diagram ref. 3)
- Leather Front Seat Restoration Kit, pair (standard/sports, Diagram ref. 4)
- Leather Rear Seat Restoration Kit, pair (Diagram ref. 5)
- Trunk Carpet set in OEM Perlon felt or Sliverknit (Not indicated)
- Rear Bulkhead Retrim Kit (Diagram ref. 6)
- Rear quarter Panel Retrim Kit, pair (Diagram ref. 7)
- Leather gearstick Gaiter/ shift boot (Carrera 3.2 only, Diagram ref. 8)
- B-pillar Retrim Kit, pair (Diagram ref. 9)
- Headlining Kit (Not indicated)
- Additional Leather, 1m<sup>2</sup>
- Complete step-by-step installation instructions and pictures

Following parts are not included in the standard kit (can be ordered separately):

- Complete New Door Pockets, pair (OEM specification)
- Complete New Dashboard (OEM specification)
- Complete New Knee Protectors (3 pieces)

- Complete New Door Caps (pair)
- Replacement Seat Base Foam, pair (Not indicated)
- Leather and vinyl paint, spectrograph matched to your interior (Not indicated)

The **Leather Front Seat Restoration Kit** includes everything you typically need to bring your front seats back to factory new condition; all front seat covers and correction foam for seat base bolsters.

Our hand crafted front seat covers (2 back rest and 2 seat base covers), match Stuttgart factory specifications step by step; from the finest Scottish hides with Porsche PoN perforation for the centre sections, colour coded vinyl, top quality calico backing material, exact specification pleat filling, right down to the piping cord and the high resistance yarns we use. All hides are precision cut, piping bound and pre-formed to guarantee a factory authentic fit.

The kit is delivered with correction foam for the seat base bolsters. This allows you to correct the worn sides typically found on the driver's side seat bolster. Bear in mind, that a significantly deformed or decomposed seat base can only be restored with new cell foam. New seat base cell foams are not included as part of this kit.

Different front seat models were used between '74 and '89 for the Coupe; the design and seat construction changed in '77 and again in '85. Throughout the period Sport seats were available as an option. Sport seat have higher bolsters. The best way to distinguish is to measure the side of the back rest. At the widest point, the Regular seat measures 12.5cm (5") whereas the Sport seat measures 17.5 cm (7").

When you are changing colour of your interior as part of your restoration project, you may want to consider painting the armrests, door handles, the leather trim around the center console and the knee protectors at the bottom of the dashboard unit to match your new interior and ensure an OEM look. Specially formulated and spectrograph matched leather and vinyl paint is not included in this kit, but can be ordered separately.

## The materials we use

Our hand crafted interior restoration kits, closely match Stuttgart factory specifications. For the carpet set we use OEM Porsche sliverknit velours, heelpads, dimple backing material and reinforcements as original.

For the seat covers and panels, we use OEM Porsche Nappa (leather), color coded vinyl leatherette, water resistant backing boards, natural rubber, natural jute, top quality calico backing materials, exact specification pleat and bolster filling. All hides are precision cut, piping bound and pre-formed to guarantee a factory authentic fit. Please bear in mind that leather is a natural material. Slight irregularities are not imperfections. They are an inherent feature of a product from nature and an integral part of its appeal.

## The colours we offer

We manufacture this kit in several original Porsche colours. We have included some pictures below. Please note that due to screen resolutions they may appear somewhat different in practice:

Please note that some colours may only be available in full leather upgrade. This is because 100% spectrograph matched leather and vinyl leather cloth – necessary for the OEM specification half hide interior - is not always available (please enquire).

Because we manufacture everything to order we can also make 2-tone interiors. This was available as a special order option for several model years (please enquire).

## Photo Gallery

We have included some pictures of Porsche 911 interiors that were recently manufactured/restored. This allows you to evaluate the quality of craftsmanship and fit you may expect from our interiors.

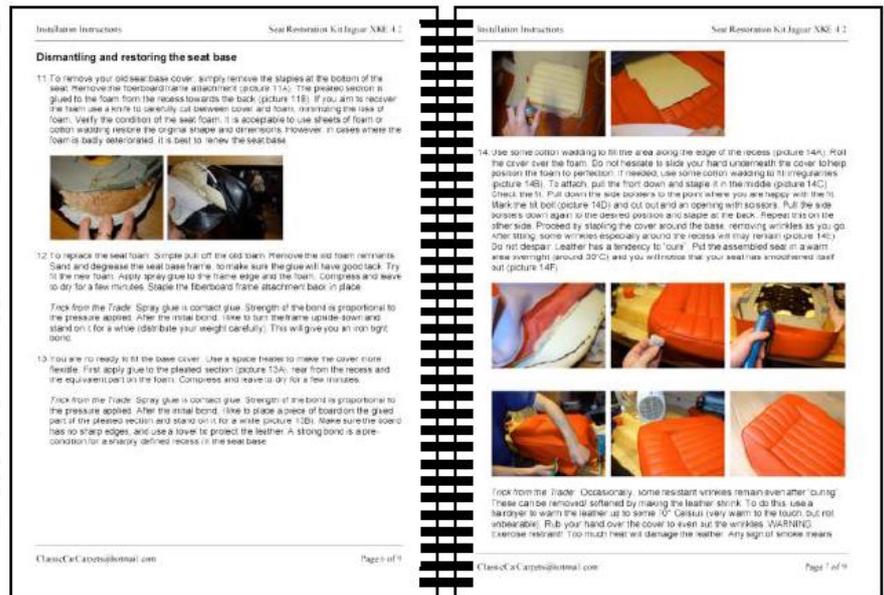

## The installation of your kit

The interior restoration kit comes with easy to follow step-by-step installation instructions and pictures.

Installation requires no specific tools and is within the ability of the moderately experienced home mechanic.

Count on 4-6 days of work to remove your old interior and reinstall your new one. This is a job best done with 2 people.

## Our quality pledge

We are continuously striving to improve our offering. If you are not 100% satisfied with our product, we offer a no nonsense replacement or money back guarantee, from the smallest part to a complete interior kit.

## Ordering information

To make sure we manufacture exactly what you need, please provide us with the following information when ordering:

- Make, model and year
- VIN number
- Desired interior color and choice of materials/finish
- RHD/LHD, Manual/Sportomatic
- Sport/regular seats

Depending on our order book, please allow 3-6 weeks for manufacture and delivery.
